RE: New U.S. Patent Application
Title: **SERVO TENSION CONTROL FOR MODULAR AFP FLOOD
ASSEMBLY**

Dear Peter, Owen and Todd:

Enclosed is a draft of the above-identified application for review and comments. Please have any corrections or changes made directly on the draft. The description of the invention and the drawings should be reviewed very carefully to ensure that they are both accurate and complete. The claims should also be reviewed, particularly claim 1, which should set forth the invention but include no unnecessary elements.

After review has been completed, please call so that we can discuss any comments and questions. I will then prepare the application in final form for signature and filing.

Yours cordially,

JENSEN & PUNTIGAM, P.S.
